
Now Sr. Engineering Manager, Mattermost
Focus Collaboration · Cloud Security · Backup & Storage · Critical Infrastructure
Stack Go, React, C++, Python, Ruby on Rails, TypeScript, AWS, GCP

Engineering leader and player-coach. I have spent 30 years shipping native and web product software, as an IC, a VP/CEO, and a people manager. I currently lead the Workflows and Integrations teams at Mattermost. Before Google Cloud Security, I co-owned Retrospect, ran engineering, and sold the company to StorCentric in 2019.

EXPERIENCE

Sr. Engineering Manager, Mattermost

Jul 2025 – Sep 2026

Secure, open-core collaboration software for critical infrastructure

Go · React · REST

- Led the Workflows team delivering Playbooks, Boards, and Docs, features that take Mattermost from chat into structured team operations.
- Led the Integrations team building plugins, AI agents, and connectors that bring customer systems and data into Mattermost.
- Rebuilt engineering operations as a player-coach: unified Jira workflows and cut the 500+ backlog to 50; optimized Sentry workflow with automated Jira routing and AI agents that triage issues and open PRs; automated a QA-heavy release process; and contributed across product and Sustained Engineering.

Engineering Manager, Google

Jul 2022 – May 2025

Google Cloud Security, onboarding GCP customers worldwide

Python · Java · Go · REST

- Led a team building infrastructure and UI for onboarding Google Cloud Platform customers via third-party identity platforms.
- Set short- and long-term technical direction with product managers, and hired and developed engineering talent.

Head of Engineering, Retrospect, StorCentric

Jun 2019 – Jul 2022

Backup and recovery for SMB and enterprise customers

React · TypeScript · C++ · Ruby on Rails

- Ran Retrospect as a self-sustaining subsidiary, covering engineering and business operations after the acquisition.
- Shipped enterprise backup on a hybrid of legacy C++ and a modern Electron/React UI for policy-based replication across local, NAS, and cloud infrastructure.

Co-owner | VP of Engineering, Retrospect, Inc.

Nov 2011 – Jun 2019

Multi-million-dollar backup software business, San Francisco Bay Area

C++ · Ruby on Rails · AWS · GCP

- Co-owned the company after taking it private in 2011; rebuilt engineering and sales (peak team of ~40) and sold to StorCentric in 2019.
- Moved production to twice-yearly releases supporting Mac, Windows, and mobile in six languages, with 20+ cloud storage backends and a real-time customer analytics console.

EARLIER CAREER

Director, Software Engineering, Sonic Solutions

May 2010 – Nov 2011

- Led Retrospect development, built out a Shanghai team, and spun the product out as a standalone company after Rovi acquired Sonic.

Director, Software Engineering, EMC

Oct 2007 – May 2010

- Grew engineering in-house and in Shanghai; shipped the cross-platform Mac & Windows Retrospect. Business sold to Sonic in 2010.

User Experience Architect, WildPackets, Inc.

Feb 2007 – Oct 2007

- Led OmniWatch, a Rails dashboard aggregating network-monitoring products.

Senior Manager, Software Engineering, EMC

Aug 2003 – Jan 2007

- UI lead for the next-generation hybrid web/native interface; principal engineer for OEM One Touch backup solutions.

Manager, Software Engineering, Dantz Development

Jan 1998 – Jan 2003

- Managed Seattle and California teams; shipped a new Windows product (.NET/C# UI, C++ backend) and single-pass database restore. Dantz acquired by EMC in 2003.

Engineer, Telecommunication Services, MCI Systemhouse; Apple Computer

1995 – 1998

- Built Apple's first intranet ordering system for Telecom and a remote trouble-ticket monitor; continued that work after the group moved to MCI Systemhouse.

EDUCATION

Centre College, Danville, Kentucky
Bachelor of Science, Mathematics

SELECTED PROJECTS

Remind Me Later — Natural-language calendar app for Mac. Reviewed in Lifehacker, Huffington Post, GQ, and New York Post; 70k downloads.

Appclicks — Co-founded an application-usage analytics service for Windows, Mac, and iOS (Rails, AWS, C++/Objective-C SDKs).
